

# Metal Roofing & Cladding

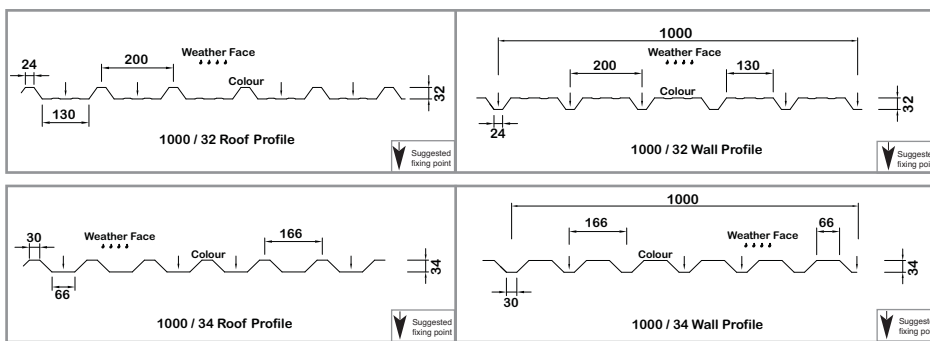

Manufactured in Devon from pre-coloured steel coils United Roofing Products Ltd can supply a wide range of profiles and finishes. All are tailor made to your requirements.

Our box profile sheeting is manufactured in both 0.5 mm and 0.7 mm thicknesses and is available in Plastisol and Polyester finishes. Plastisol has a leathergrain finish, which is available in a wide range of colours and has a long life span, a project specific guarantee of up to 30 year is available on request. Polyester is a smooth paint finish, available in a limited range of colours. (see our website for colour options or ask for samples). When material has to match existing please make us aware as colours can vary from batch to batch.

## Profiles

Other profiles can be supplied when it is essential to match existing cladding.

## Fixing profiled sheets

Fixing is easy at the points indicated above. A minimum pitch of 4° is recommended, with supports being no more than 1.83 m apart for 0.7 mm thickness. We advise that a DPC be applied to all timber purlins prior to fixing. We recommend a minimum 150 mm end lap. We advise to stitch side laps together at 400 mm centres with a single run of sealant. End laps should be sealed with two runs of sealant. We can supply all fixings complete with coloured caps. Flashings like Ridges, Bargeboards etc are supplied in 3 m lengths with edge welded to strengthen.

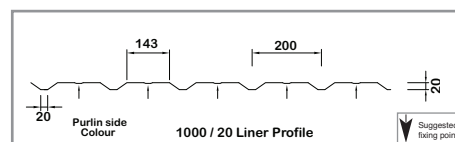

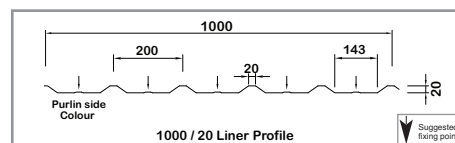

# Corrugated Metal Sheets, Liner Panels, Roof Lights & Accessories

## Liner panel

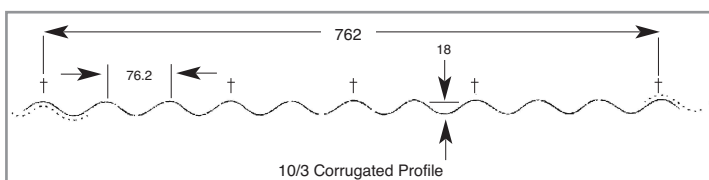

A 0.4 mm lightweight panel for internal lining of roof or walls in all types of buildings. Coloured white on one side it can be installed above or below purlins.

For 'non fragile' construction 0.7 mm thickness is required and can be provided in 1000/32 profile.
